

OBJECT CARPET

Product information AT Velours

Product Information: AT CONTRACT - The carpet presents itself with a velour construction, featuring a shimmering surface of elegant appearance. The choice of color has a decisive impact on the visibility of the tiles as well as the maintenance effort. The lighter the color choice, the more delicate it can be. Installation Information: Great attention is placed on laying the tiles in a harmonious alignment, thus creating a coherent overall image. At the same time, care is taken not to trap the pile - that is, the yarn ends - at the seams, in order to preserve both the aesthetic quality and the lasting functionality of the carpet.

Fitting on Double Floor

In case the tiles are intended for installation on a double floor, they must be fully fixed. The tile edges must be set back relative to the double-floor panels upon installation. In so doing, you will get the best covering possible - and no dust joints.

Chess board

The tiles are laid offset by 90° with the running direction and the light and shadow play of the pile layer creates a chessboard pattern.

Conductive installation

In IT data centers and rooms with specific requirements, a conductive installation is often required. The AT Acoustic Tiles are equipped with permanently conductive fiber material and can, therefore, be installed exclusively in a conductive manner.
