- 100% recycled yarn
- Recycled primary backing
- Easy cleaning with water only

### Product Information

The fabric surface of bouclé velour is characterized by a lively surface appearance. The delayed regeneration behavior of the fibers is typical of the loop quality. Impression marks recover after a short period of use.

### Installation Instructions

An accurate, professional seam cut is made on the back of this shag quality, inside the nap, using a chopping knife. The use of "pile clamps" should be avoided; alternatively, it is recommended that the pile is carefully taped to the side with masking tape, which can be easily removed after insertion.
